A diagram showing a 4x2 grid of rectangles. The grid is composed of 8 rectangles arranged in 4 rows and 2 columns. A horizontal line runs through the center of the grid, passing through the middle of each rectangle in every row. At each of the four intersections where the horizontal line meets a vertical boundary (between columns or between rows), there is a dark blue dot. From each dot, a vertical double-headed arrow extends both upwards and downwards, spanning the height of the two rectangles immediately above and below the dot. The arrows are dark blue, and the dots are also dark blue. The rectangles are light gray with thin black outlines.
